

Bible Quizzers,

There is some memory software that you may have downloaded before. It's called "Scripture Memory System". If you have the software, you don't have to download it again.

- Save the files I have attached somewhere handy. (If you want Club 300 or more, let me know.)
- Go to the website <http://www.memoryverses.org/download.htm>
- Click on "Download" then "Download the full program"
- After it downloads, go through the install procedure.
- A blue Bible shows up on the screen. Click this to start the program.
- Create a new user
  - In the "Select User Name" page, add yourself as a new user. Click your name and then "OK".
  - In the "Select Verse File" page, select "New".
  - In the "Create new user" page, enter a name for a new verse file, like "CORINTHIANS\_CLUB\_150"
  - Click this new file name, and click "OK"
  - Enter your name and choose your language
- On the "Getting Started" page, click "Close"
  
- On the top bar, click "File", then "Import verse cards", then "Browse".
- Find your file and click "Open".
- Click "Import" then "Yes".
  - It will go through all of the verses, landing on the last one.
  - Click "Ok".
- Now click "<<" to go to the first verse.

There may be a few other stray things in the setup. If you have trouble or questions, let me know. Try different things.

Have Fun!

In Christ,

Philip Osterlund
